I am Haikal Yusuf Azzam, an Internet Engineering student with a keen interest in networking, cloud, and AI solutions. I focus on learning how to build resilient environments, secure systems, and develop software. Having learned through Cisco, AWS, and Oracle resources, I am eager to share what I know and learn from professionals to bridge the gap in industry practices.

Education Level

Universitas Gadjah Mada - Yogyakarta, Indonesia <i>Bachelor of Internet Engineering, 3.75/4.00</i>	Jul 2023 - Jul 2027 (Expected)
• Implementation of virtualized microservices and AI workloads on OpenStack Private Cloud (Interdisciplinary Project) • Project IoT-based monthly PDAM water consumption and calculate costs in real time. (Embedded System Project) • Project IoT-based earthquake detection system utilizing ESP32 and MPU6050 sensors to transmit real-time seismic data to a full-stack web dashboard for remote monitoring and early warning. (Server Technology Project) • Developed a resource-efficient private CI/CD pipeline at UGM using Gitea, Webhook, and GoAccess for automated deployment and real-time monitoring. (Network Administration Project) • Focused on Cybersecurity with a proven track record in conducting penetration tests, threat analysis, and developing security-driven API solutions.	

Work Experiences

Universitas Gadjah Mada - Yogyakarta, Indonesia <i>Laboratory Assistant Object Oriented Programming</i>	Feb 2025 - Jun 2025
• Mentored students in applying Object- Oriented Programming (OOP) principles, providing hands- on guidance on concepts like Encapsulation, Inheritance, and Polymorphism using Python. • Co-designed practical programming assignments focused on OOP, challenging students to model real-world systems that implement OOP. • Evaluated student code to OOP principles and providing feedback.	
Universitas Gadjah Mada - Yogyakarta, Indonesia <i>Laboratory Assistant Basic Programing Python</i>	Aug 2024 - Dec 2024
• Support instructors in running Python programming lab sessions for students, • Help with grading assignments, projects Python, providing constructive feedback to improve students' understanding and skills. • Develop practice exercises that align with the Python programming curriculum. • Observe students' work, offer guidance, and provide feedback on assignments or in-class exercises related to Python programming.	
Dinas Komunikasi dan Informatika DIY - Yogyakarta, Indonesia <i>CSIRT Intern (Security Development) - KAMISANDI</i>	Dec 2024 - Feb 2025
• Developing an API to assess password security levels in a login system. • Developing an API for web header scanning and security assessment. • Creating materials and conducting lab experiments for penetration testing in a sharing session with employees and other interns.	
SAMSUNG INNOVATION CAMPUS BATCH 5 - AI & IoT Bootcamp	Feb 2024 - Jun 2024
• Completed a 4-month intensive training in AI & IoT. • Hands-on experience in sensor integration, device programming, and data communication. • Delivered a functional IoT solution through a multi-disciplinary collaborative capstone project.	

Organisational Experience

Unit Penalaran ilmiah Interdisipliner (UPII) - Yogyakarta, Indonesia <i>Head of Technical division (BSO PALAPA)</i>	Apr 2023 - Present
• Ensure the magazine design is in accordance with the predetermined concept.Check the completeness and accuracy of the content of each page.	
FORKOM TRI - Yogyakarta, Indonesia <i>Head of Research and Strategic Division</i>	Jun 2025 - Present
• Provided a student perspective to advocacy efforts, reviewing 100+ issues raised by students, resulting in resolutions and improved student satisfaction	

Skills, Achievements & Other Experience

- **Technical** : Programming (Python, Bash Scripting, SQL), Infrastructure & Virtualization (Docker & Containerization, KVM/ QEMU), Networking (Routing, Switching, TCP/IP), Cyber Security (Network Security, Vulnerability Assessment, Linux Security Hardening, Traffic Analysis & Monitoring), IoT, Web Development.
- **Spoken Languages**: Indonesian (Native), English (Professional).
- **Achievements** 🏆 (2024) : Reached the semifinals in the Samsung Innovation Campus competition, competing against 4000+ participants.
- **Achievements** 🏆 (2025): AI-Volution Ambassadors supported by the U.S. Embassy Jakarta in collaboration with Biji-biji Initiative.
